Cylinder Lead Replacement Plan

Safety isn't the absence of injury, it's the reduction of risk.

[Know More](#)

Did You Know?

The highest risk for an incident in an acetylene plant is the cylinder lead?

The average acetylene plant has 27 kinked or damaged leads?

Every Damaged Lead = Potential Catastrophic Loss of Assets

Rexarc is now offering a cylinder lead with over 20 years of lifecycle testing. Every lead you buy is likely the last one you will have to replace during your career!

[Know More](#)

Features

- ✓ ISO 14113 Compliant
- ✓ 300 bar pressure rating
- ✓ Anti-whip with flow stop

Benefits

- ✓ Global standard of product quality
- ✓ Reduces incident escalation should one occur

Options to Consider

Cylinder connections and flame arresters in one assembly. Non-tethered/Anti-whip design also available with same lifecycle quality.

5 Easy Steps to Implementation with Rexarc

- 1** Determine Your Standard Configuration
 - ✓ Lengths
 - ✓ With or without flame arresters
 - ✓ With or without Cylinder Connections

- 2** Determine Volume Quantity
 - ✓ How many connections are there in your plant?

- 3** Determine Schedule for Replacement
 - ✓ Monthly, Quarterly, Annually

- 4** Release one purchase order for your replacement plan program

- 5** Rexarc ships to schedule

Rexarc partners with LifeGuard Technologies to Distribute Innovative Safety Solution to Acetylene Plants.
